ABOUT OUR

COMPANY

VITRO is the premier data center service provider in the Philippines.

VITRO Inc. is the pioneer in hyperscale-grade data centers in the Philippines and has delivered secure, reliable, and fully compliant data center solutions for more than two decades to empower mission-critical operations for both enterprises and hyperscalers. Its extensive network encompasses 11-state-of-the-art facilities strategically located across the country. As a subsidiary of ePLDT and the data center arm of the PLDT Group, we provide clients with unparalleled data security, unmatched uptime, and adherence to international compliance standards.

VITRO provides data center services tailored to the specific needs of enterprises and hyperscalers, enabling their businesses to achieve hypergrowth in the digital era.

VITRO puts **YOU AT THE CENTER** of the country's digital ecosystem where technologically-driven organizations connect and collaborate to maximize business growth in the digital world.

With robust and hyperconnected data centers, VITRO provides the foundation for businesses' success in the digital age. VITRO is home to a rich and diverse digital ecosystem, in which enterprises, the public sector, telcos, and cloud service providers synergize and connect to collectively thrive in the digital landscape.

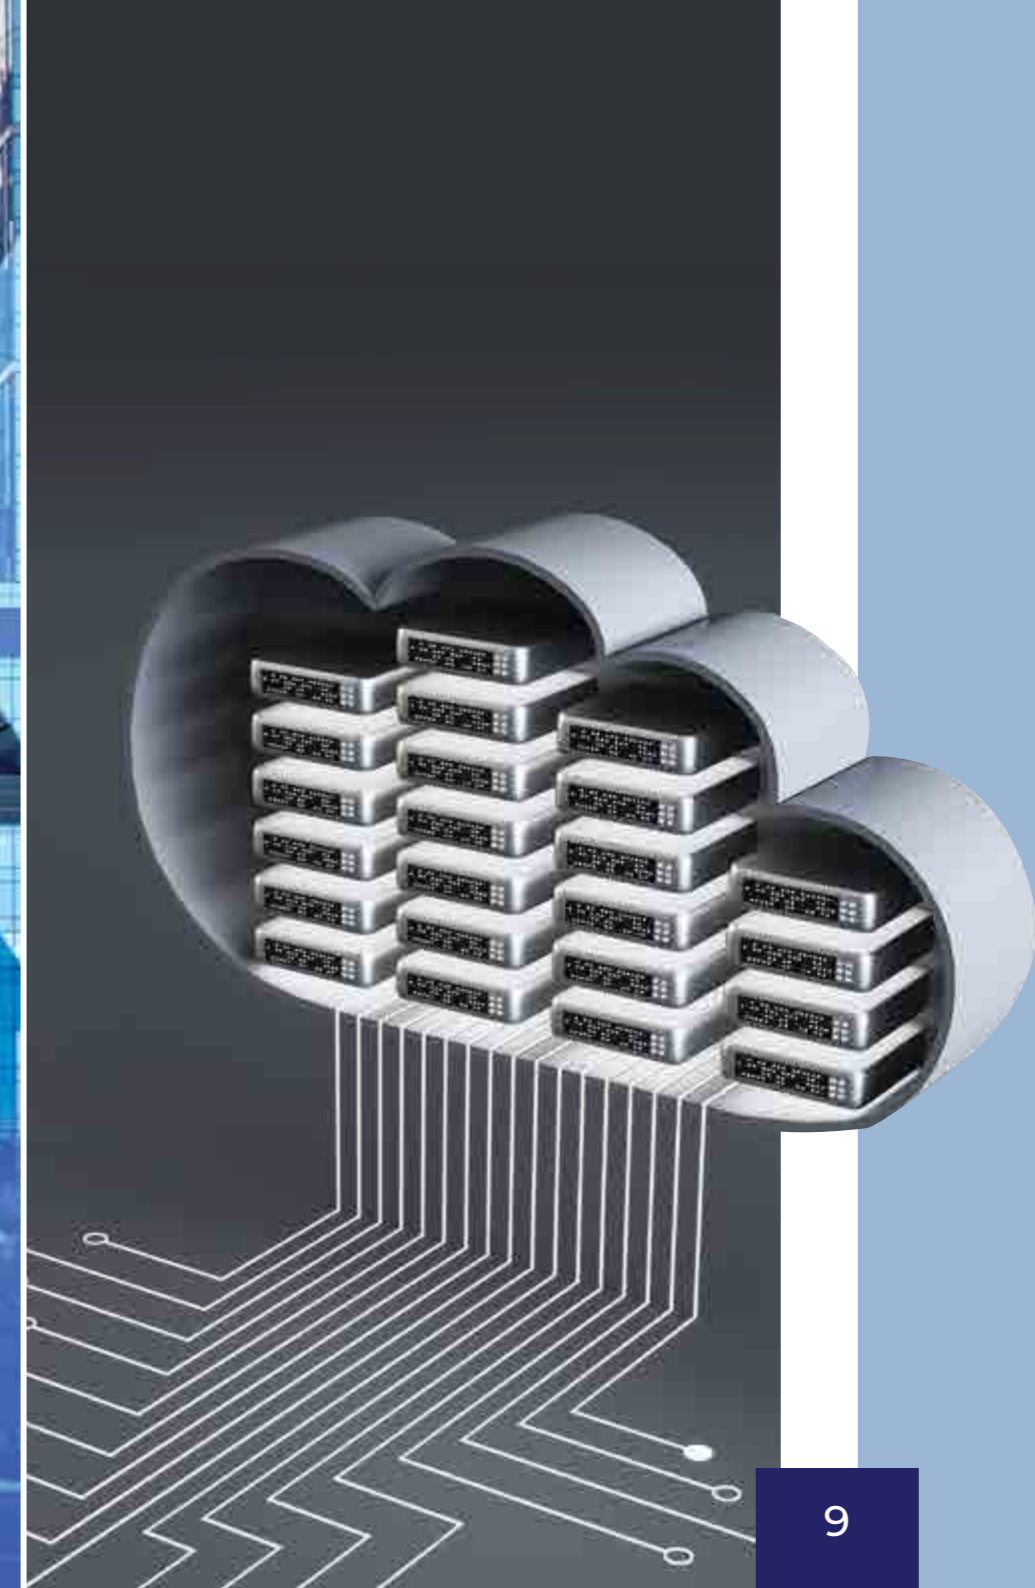

Hosting your digital infrastructure in VITRO puts your business at the center of digitalization.

OUR MISSION

8

We build and operate data centers that power a digital ecosystem enabling tech-driven enterprises.

9

A TRAILBLAZER IN DATA CENTER FOOTPRINT

In 2000, the inauguration of the first ever VITRO Data Center in Pasig City marked a significant milestone, establishing its leadership position in the data center industry in the Philippines.

VITRO Inc. proudly operates the largest data center network across the nation.

Committed to our mission, VITRO continues to make significant investments to empower businesses nationwide, accelerate the country's digital adoption, and improve the digital lifestyle of every Filipino.

Up to 11-layers of physical security designed to provide the most secure and impenetrable structure for your data

Diverse fiber routes and direct connection to cable landing stations meshed with PLDT's domestic network connection

Highly-customizable design to cater to on-demand requirements of both enterprise and hyperscale clients

THE DESTINATION FOR **HYPERSCALERS**

The Philippine data center market is a fast-rising haven for hyperscalers from across the globe.

As more technology companies turn their gaze towards the country, VITRO continues to build state-of-the-art data centers that can provide, manage, and protect the technologies that reshape the digital world.

THE PHILIPPINES' FIRST TRUE HYPERSCALE DATA CENTER

VITRO Sta. Rosa rises as the country's largest data center campus by far — a five-hectare property in the booming industrial city of Sta. Rosa, Laguna. The data center facility is designed to be energy efficient, utilizing the latest innovations in cooling and power redundancy, Rated-3 certified and Rated-4 ready, and with the highest level of network diversity and resilience with at least three diverse fiber routes.

Additionally, VITRO Sta. Rosa hosts the country's richest internet ecosystem and premier internet exchanges, making it the most ideal location for Availability Zones and Points-of-Presence of hyperscalers, as well as for critical systems of enterprises.

30 km from the airport

34 km from VITRO Makati 2

Directly connected to JUPITER and other major CLS

3 points of entrance for cable diversity

Min 20% Renewable Energy

Dedicated Substation

SPACE & FACILITIES

SLA 99.99%

13,140 SQM White Space
18 data halls with 250 racks each

36 MW IT Load Capacity
Average power of up to 8 KW per rack

2 MW Power per Data Hall
60 MW dedicated substation

N+1 Gen Set per Floor
72 hours backup fuel

10 Minutes Thermal Storage
N+20% modular fan wall units

10 Minutes UPS Backup Time
2N UPS per data hall

CARRIER NEUTRALITY

With min. 3 Points of Entrance (POE)
Multiple points of entrance to enable cable diversity

Direct Connection to International Cable Landing Stations in the Philippines
Multiple and diverse international cable system options from VITRO Sta. Rosa to Singapore, Japan, Hong Kong and USA

608 SQM Telecommunication Space
8 telco rooms with 26 racks each

SUSTAINABILITY

LEED Compliant for Construction & Design

Design by Red Engineering and project and implementation management by Mace TPM to ensure full compliance to LEED certification

- 35% min. renewable energy
- 1.4 Design PUE
- Natural light optimization
- Passive cooling
- Insulation cladding
- Solar farm

22

VITRO Internet Exchange (VIX) hosts the richest IP ecosystem in the country, comprised of the biggest telcos, ISPs and content providers, and is continuously growing to significantly improve the digital experience of every Filipino.

Simplified connectivity

Access to multiple
peers over one
physical port

Lower costs and latency

Reduced unwanted
latency and costs via
upstream provider

Improved Performance

Faster, more direct
data flow with fewer
network hops resulting
to reduced latency

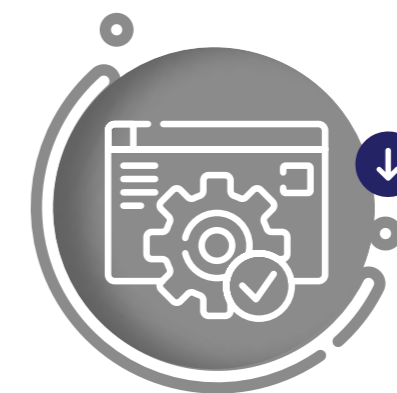

VIA VITRO INTERNET ACCESS

**FASTEST AND MOST RELIABLE
INTERNET SERVICE INSIDE
VITRO DATA CENTER**

VITRO Internet Access (VIA) is a blended internet solution that converges at least 3 unique networks into a single package as it leverages and harnesses the strength of each network and provide unmatched managed connectivity to the Local and Global Internet.

**Superior
Performance**

**Guaranteed
Service Levels**

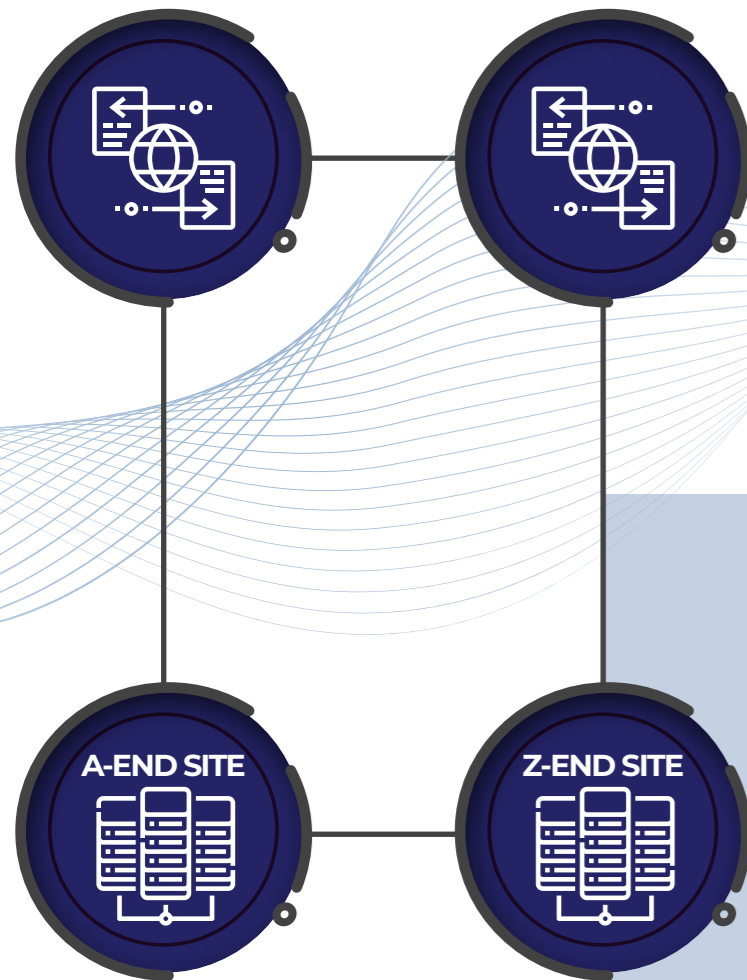

**Agile and
Scalable**

23

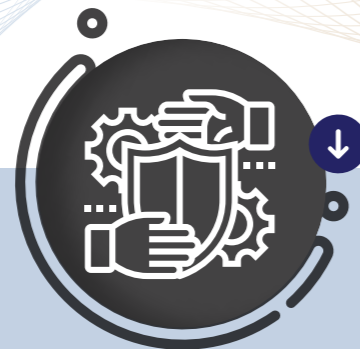

DCI VITRO DATA CENTER INTERCONNECT

VITRO
DATA CENTER A

VITRO
DATA CENTER B

Access new opportunities, diversify your services and close the gap between content and users with VITRO connectivity solutions.

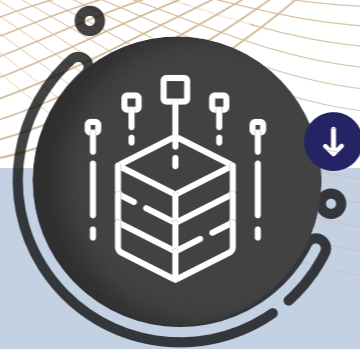

RELIABILITY

Secure and highly reliable connections between customer demarcation points inside the data center

QUICK AND EASY

Establish fast and easy end-to-end connection from your infrastructure to customers and partners across different VITRO sites in the Philippines

FLEXIBLE BANDWIDTH OPTIONS

Choose the bandwidth you need. Available in 1G, 10G and 100G

VCX VITRO CLOUD EXCHANGE

Optimize your hybrid cloud architecture with a seamless, secure, and fully controlled connection between your private infrastructure and cloud resources.

BETTER CLOUD APP PERFORMANCE

Increase reliability and reduce latency and risk of performance issues

GUARANTEED SECURITY

Move sensitive data securely from your server to the cloud

LOWER CLOUD SERVICES FEES

Enjoy lower data transfer rates
